

- **Smallest relay module for 100-240VAC up to 10 Amps. switching current**
- **Smallest power consumption, 0.6 Watts max.**
- **Simply operates with CASAMBI.**
- **Additional inputs for 4 push buttons**

The relay module LIGA.AIR.REL.4T.240 is controlled by the CASAMBI application. The module has 4 inputs for isolated switches (dry contact) for additional, free programmable functionality in the CASAMBI application.

The module is directly connected to 240VAC and its relay output has a switching capability up to 10 Amps.

The module is capsuled in a black PC housing with the dimensions of 44 x 44 x 23mm. The attached mounting brackets for 3mm screws (or similar) can be easily removed if necessary.

The extremely compact design of the housing allows an easy installation in flush-mounted boxes or in a cable duct.

Compatible devices:**Range:**

CASAMBI uses mesh network technology so each CBU-ASD acts also as a repeater.

Longer ranges can be achieved by using multiple CASAMBI units.

Range is highly dependent on the surrounding and obstacles, such as walls and building materials.
