

LIGA.AIR.DMX

LIGA.AIR.DMX.RGBW

Normally, this is set to OFF

i.e. the DMX light can be controlled via the CASAMBI APP

On this interface you can control the luminaire and trigger the programmed colours and animation under Scenes. (Or programme them yourself)

DMX also still has its own programmed light shows, which you can call up under 1-10. These are fixed, but you can set the speed and dimming with the two sliders.

Have fun
